Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-4, 10, and 11, drawn to a vaccine comprising an immunogenic EBNA-1 polypeptide and an adjuvant, and a method of use of the vaccine.

Group II, claim 5-9, 12-15, 18, and 19, drawn to an expression vector for expression in humans comprising a sequence encoding an immunogenic EBNA-1 polypeptide and a method of immunizing using the expression vector.

Group III, claims 20-34, drawn to a pharmaceutical composition comprising an EBNA-1 charged dendritic cell and a method of immunizing using EBNA-1 charged dendritic cell.

Group IV, claims 35 and 37-39, drawn to a method for making an EBV-protective human dendritic cell comprising contacting the cell with EBNA-1 *ex vivo*.

Group V, claim 36, drawn to a method for making an EBV-protective human dendritic cell comprising contacting the cell with EBNA-1 *in vivo*.

Group VI, claims 40-45, drawn to a method for making an EBV-protective human dendritic cell comprising contacting the cell with a vector for expression of EBNA-1 in humans.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of the main invention, i.e., the invention of Group I, is a vaccine comprising an immunogenic EBNA-1 polypeptide and an adjuvant acceptable for use in a human, and a method of immunizing a human using the vaccine. The EBNA-1 polypeptide composition of Group I does not require the invention of Group II since EBNA-1 polypeptide can be purified from other sources, including *in vitro* cell cultures; thus the invention of Group I does not share a special technical feature with the invention of Group II. The invention of Group I does not share a special technical feature with any of the inventions of Groups III-VI since the invention of Group I does not require a dendritic cell.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
